

# pmkslimbox für tt\_products

1. pmkslimbox installieren
2. Im Include Static (from Extension) - Feld im root Template das Template "SlimBox(pmkslimbox)" einfügen
3. Diesen Code ins Setup:

```
1. //Slimbox
2.
3. plugin
   .tt_products
   {
4.
5.     image

6.     {
       imageLinkWrap

7.     {
       typolink

8.     {
       parameter.
       cObject
       = IMG_RESOURCE
9.     parameter.
       cObject
       .
       file
       .import.
       data
       = TSFE:lastImageInfo|origFile
10.    parameter.
       cObject
       .
       file
       .maxW =
       {
       $plugin.pmkslimbox.slimBoxMaxW
       }

11.    parameter.
       cObject
       .
       file
       .maxH =
```

```

    {
    $plugin.pmkslimbox.slimBoxMaxH
    }
12.
13.
    ATagParams
    = rel=
    "lightbox"
14.
    ATagParams
    .override = rel=
    "lightbox[sb{field:uid}]"
15.
    ATagParams
    .override.
    if
    .isTrue =
    {
    $plugin.pmkslimbox.
    imgtext
    .navigable
    }
16.
    ATagParams
    .insertData =
    1
17.
    }
18.
    }
19.
    }
20.
21.     listImage
    {
22.
    imageLinkWrap

    {
23.
    typolink

    {
24.         parameter.
    cObject
    = IMG_RESOURCE
25.         parameter.
    cObject
    .
    file
